LAT 6062 GOVT OF INDIA

From the D-C chittaldrug vide
No A-6 673/44 & 15/4/Vol-
furnishes the information called
for

1) the estimate of Rs 1,11,532/- submitted
by the D-C chittaldrug for the compre-
hensive drainage scheme at
chittaldrug Town has been scrutinised
by the C-E for Irrigation & Rs 1,06,779.

2) the scheme is proposed to be
financed equally by the govt and the
local bodies in equal proportions

3) It is seen from the report
since received from the D-C, the
bodies plead that they are unable
to meet their share of the cost from
out of their normal sources, for reasons
stated therein and hence they pray
that a loan to the extent of half
the cost Vz Rs 53,388/- may be
given ~~as a loan repayable in~~
~~25 annual~~ They propose to
repay the same in 25 annual
instalments from out of the
realisations of toll revenue in
the bodies

4) In this connection, it
may be stated that out of the

WD 02139—GPB—20 000—26 2 45

provision of Rs 2 lakhs provided in the state budget for 44-45, a sum of Rs 10,000 is available now. In order to meet ~~an addn~~ the portion share of the cost which comes to Rs 53,388/-, a sum of Rs 43,388/- is still required, if the scheme ~~is~~ when it is sanctioned at present. Hence a demand for an additional grant of Rs 50,000 may perhaps be placed before the next L C ~~soon~~ towards the portion share of the cost of the work in question

2) In the above circumstances,

1) The estimate for Rs 1,06,775/- may be sanctioned, the cost being met by the govt & the local municipal in equal proportions

an additional grant of

2) A demand for Rs 50,000 may be placed for improvement of drainage works in Towns before the next L C under 30-grants for public improvements - '3 Improvement of Towns and town utilities' ~~which includes a provision of Rs 2 lakhs for drainage works in Towns~~

3) A sum of Rs 53,400/- may be granted as loan to the chittaldrug Town municipal carrying interest at 4½ % p.a and repayable in 25 annual instalments to meet their share of the cost

22/ Financial Secretary may be consulted in the matter as regards items 2 & 3 referred to above

23/ Subject to the reference in para 11, 12 & 13 supra

Sd/- 28/4.

24) The estimate for the Drainage Scheme in Chitaldrug Town as sanctioned by the Chief Engineer for Roads & Buildings amounts to Rs 10,6,775/- & it may be sanctioned.

A

The cost may be met by the Government & the Chitaldrug Town Municipality in an equal proportion.

B

25 The work may be spread over a period of five years

C

26) The cost of the work for each stage comes upto Rs 21335/-

The Chitaldrug Town Municipality can, without taking a loan, set apart a sum of Rs 10000/- every year for five years to meet its share of the cost. The Govt grant of an equal extent may be paid with the grant for drainage to be

Hon Sec
Hon'ble Mr G Ramachandra Rao to present the case.

B 18/6 6820

The proposals are to sanction a comprehensive drainage scheme for the Chitaldrug Town at a cost of Rs 1,11,532, half the cost being met by a grant from Government, the work being spread over 5 years. Department anticipates that the share of contribution by the Municipality could be met from the normal revenues of the Municipality without any borrowing The proposals may be accepted. But it may be pointed out that the above estimates are for sylk pattern drai I need hardly state that Sylk pattern drains for carrying sewage and sullage are out of date and the mo modern drainage schemes are underground drainage schem

WD 02139—GPB—20 000—26 2 45

Chitaldrug town drainage

C F 69]

Continuation Sheet | File No / Current No | of 6864/1 | Page

We in Mysore have also got the necessary facilities for putting up underground drainage schemes since the drainage pipes and cement are manufactured in our own State.

37) With regard to the water facilities that are essential for giving house connections, a comprehensive water supply scheme for Chitaldrug Town has already been sanctioned and the work has partly been executed I think and is held up now owing to war conditions and would perhaps be taken up immediately after the war is over. I think therefore that when we are at it we may have once for all an underground drainage shcme especially as Government is giving a large grant of Rs 50,000 for this scheme I may add that in most towns and minor Municipalities, my experience has been that these sylk pattern drains are so badly neglected and in disrepair that sewage and sullage stagnate badly and this drain becomes a fruitful source of bad odour, for accumulating filth and perhaps illnesses I would submit therefore that instead of spending 1 lakh on sylk pattern drains, the question of underground drainage scheme might be taken up once for all.

c) Subd The anticipated Toll revenue for 1947-48 as per sanctioned budget is Rs 15,110/- — ref^ce para 18 of 12

Flag K

(page 2 item 5 of the Estimates file MG)

81) The revised estimate is for perusal with reference to the discussions in paras 37 to 44 supra

82) As against the original proposal to provide Syke pattern drains at a cost of Rs. 1,11,532/- it is now proposed to provide an underground drainage for Chitaldrug Town at a cost of Rs 6,03,700/- The expenditure is proposed to be met on equal proportions by the Government and the Municipality, a loan being also sanctioned to the Municipality to meet its own share of the half cost The loan is to be repayable in 25 years The Municipal share of the expenditure will be Rs 3,04,850/- and of this sum is to be repaid by the Municipality in 25 yearly instalments - the Municipal Council will have to pay a sum of Rs 12,194/- towards principal, and exclusive of interest charges

83) The Municipality expects (in January 1947) that their income from tolls would go up from about Rs 14,000/- to about Rs 20,000/- and proposed to earmark this income towards repayment of the loan It is however, seen from the budget of the Municipality

Underground drainage for Chitaldrug town.

Serial No

for the Year 1947-48
that the expectations have not yet materialised and the income anticipated is only Rs 15,110/ If interest charges are also added to the yearly instalment of loan, the prompt repayment of the loan may throw a strain on the Municipal funds as they are

Rs 15-12-47 —

(2) Letter No 592 dated the 13th December 1947 from the Chief Engineer for Roads & Buildings stating that an estimate for Rs 6,09,700/- has been submitted for the above work for communicating sanction of Govt thereto.

—

84) The file which was submitted to the Minister for L S G in connection with an interpellation on the subject on the floor of the House has since been received and is herewith put up The estimate, as scrutinised by the Director PW D and the Chief Engineer, Roads and Buildings amounts to Rs 6,09,700/- which has also been duly countersigned by the President, Chitaldrug Town Municipal Council

(3)

85) As regards the funds required for the work, the matter has been discussed at length in paras 82 & 83 of the notes The Municipal Council's finances are not sound and the revenue from Tolls

Minutes 24/1-3-48

D.T. 23/1/48

Underground drainage scheme for Chitaldrug Town 3284 Cal

89) I had a personal discussion with the President Chitaldrug Town Municipality - a week back. He assured me that he is confident of the estimated income and also sufficient to repay the Govt loans they have sought the Toll gate income amounting to Rs Rs 16000/- towards the repayment of the Govt loans. Besides they are expecting a good lot of income by disposing of the new sites I have personally inspected the Town which is very badly in need of underground drainage I am convinced that they have got sufficient source of income to meet all the demands The loans to be prayed as recommended by the D.C may be secured out of the Toll gate collection and necessary arrangements may be made according to earmark the above income towards the above loan. Hence I am in favour of sanctioning the scheme this may be placed before the council. OK 6/2/48

"EXTRACT"

Chief Secretary to Government 21/5

Minister L.S.G. 8

Estimate amounting to Rs 6097001- for underground drainage scheme for Chitaldrug Town

Serial No

Submitted

129) Final Note has been fair typed embodying the Council ~~resolution~~ resolution dated the 20th May 1948 It is proposed to sanction the estimate in question for Rs 6,09,700 giving half the amount as an outright grant and the other half as a loan to the Chitaldrug Town Municipal Council carrying interest at 4% per annum

130) It may be mentioned here that the total allotment for Town Improvement works for the year 1948-49 is only Rs 4 5 lakhs and if the grant of Rs 3 lakhs is given away in one year for a single town, the amount left would be insufficient for the remaining town improvement schemes It is therefore suggested that the expenditure over the Chitaldrug Drainage scheme be spread over three years at Rs one lakh a year as outright grant and at Rs one lakh as loan each for

131) It may also be difficult to complete the whole work in the course of a year

132) For orders re above

Final note by the Minister for Local Self Government

Subject — Estimate amounting to Rs.6,09,700/- for underground drainage scheme for Chitaldrug Town

The existing surface drainage system in Chitaldrug Town was reported to be not working satisfactorily and the question of providing a suitable drainage system for this town, has been engaging the attention of Government from the year 1944 In November 1944, the Deputy Commissioner, Chitaldrug, submitted A for sanction, an estimate amounting to Rs.1,11,532 for the provision of Sylk Pattern Drains for carrying sullage and sewage, as prepared by the Sanitary Engineer, Bureau of Sanitary Engineering This estimate was forwarded to the Chief Engineer for Irrigation for scrutiny, and it was corrected by him after scrutiny to Rs.1,06,775/- Para 2 of Note

2 When the papers were referred to the then Financial Secretary to Government (Mr B S Raghavendra Rao) he observed that the Sylk pattern drains provided in the estimate are out of date and that the most modern drainage schemes are underground drainage schemes, and that as the necessary facilities for putting up the underground drainage existed in Mysore, Government may consider the desirability of sanctioning an underground drainage scheme to this town once for all The Deputy Commissioner, Chitaldrug District and the Chief Engineer for Roads and Buildings were thereupon consulted on the above suggestion of the Financial Secretary Para 36 of Note

3 In January 1947, the Deputy Commissioner, Chitaldrug District, B submitted for sanction an estimate prepared by the Sanitary Engineer and approved by the Director of Public Health for Rs.5,86,550/- for providing an C underground drainage system for Chitaldrug Town, together with the resolution of the Chitaldrug Municipal Council dated 31st August 1945 stating that

the

underground drainage scheme be adopted and Government be requested to meet half the cost, the remaining half being granted by the Government as a loan to the Municipality repayable in 25 annual instalments It was also stated in the above resolution that the revenue from tolls will be earmarked to meet the loan liabilities due to the Government towards instalments and interest The estimate for Rs.5,86,550/- was scrutinised by the Chief Engineer for Roads and Buildings and the Auditor, Public Works Department and it has been corrected to Rs.6,09,700/- It has also been countersigned by the President, Chitaldrug Town Municipal Council

4 In the report accompanying the above estimate, supply of water at 15 gallons per head per day has been assumed for a successful working of the underground drainage system In this connection, it may be stated that an estimate for Rs.3,14,000/- for improving the Water Supply arrangement and the distribution system at Chitaldrug has been recently sanctioned by the Gobernment

5 When the papers were submitted to me, I minuted as follows -

"I had a personal discussion with the President, Chitaldrug Town Municipality, a week back He assured me that he is confident of the estimated income (and which is also) sufficient to repay the Government loans They have set apart the toll-gate income amounting to nearly Rs.16,000/- towards repayment of the Government loans Besides, they are expecting a good lot of income by disposing of the new sites I have personally inspected this town which is very badly in need of underground drainage The loan to be repaid as recommended by the Deputy Commissioner may be recovered out of the toll-gate realisation and necessary arrangement may be made accordingly to earmark the above income towards the above loan Hence I am in favour of sanctioning this scheme This may be placed before the Council "

6 When the papers were forwarded to the Financial Secretary, he made the

following enquiries -

"What is the rate of interest proposed to be charged for this loan? What other loans are outstanding against this Municipality and is the normal income exclusive of the toll revenue sufficient to repay the same? If the toll revenue is not enough to repay the annual instalments of this particular loan (both principal and interest) is the normal income enough to make up the deficiency? If there is an all round deficiency, is there any scope for additional taxation and is any such proposed and accepted?"

7 The Deputy Commissioner, Chitaldrug, has reported that the Municipal Council is agreeable to pay interest at 2% or a little more and that no loan is outstanding against this Municipality He has also stated that if the scheme is sanctioned, the Municipality has to pay per year an annuity of Rs.18,291 (Principal Rs.12,194 and interest at 2% 6,097) and that the toll revenue which is at present Rs.14,603 and which may go up to Rs.20,000 is sufficient to repay the loan An additional revenue of Rs.50,000/- is also expected from the levy of octroi on certain articles, which has since been sanctioned by Government It is also proposed to levy additional taxes such as a duty on transfer of immoveable properties, - in the shape of an additional stamp duty, general water rate etc , and the Deputy Commissioner has assured that there would be no all round deficiency

The matter was considered at a meeting of the Council of Ministers held on the 20th May 1948, and the following resolution was recorded:-

" (i) The estimate is sanctioned, (ii) Half the amount may be given by way of grant, (iii) Half the amount may be given as loan, (iv) the interest may be charged at 4% per annum "

The work will be spread over a period of three years and the Government

(F N —contn)

grant also will be given at the rate of rupees one lakh each year, the balance being adjusted in the last year

I solicit the gracious sanction of His Highness to the above resolution of the Council

[illegible]

Re: [illegible] Estimates for - (1) Improving water supply to Chitaldrug Town and (2) for improving the distribution system therein.

The question of improving water supply to Chitaldrug Town has been engaging the attention of Government for some years past. In the year 1940, Government sanctioned a scheme of water supply to this Town from the Jathral Tank at an estimated cost of Rs.4.75 lakhs, under Government Order No. 7544-7/Fl.110-36-GS dated the 1st March 1940, the cost being distributed between the Government and the Municipality in the ratio of 3:1. A modified estimate for the same amount was sanctioned in November 1941. Later, a revised estimate for Rs.4.436 lakhs was submitted for this work, for sanction of Government, by the Director of Public Health, but this could not be worked out owing to the difficulty of getting materials on account of the war. Under this scheme, Government had paid a sum of Rs.2 lakhs at Rs.1 lakh per year in 1941 and 1942, as its share of cost. Government had also sanctioned the payment to the Chitaldrug Town Municipality, of a loan of Rs.1 lakhs to meet its quota of cost and against this account, an expenditure of Rs.89,283/- is reported to have been booked in the Comptroller's accounts. After a net expenditure of Rs.1.78 lakhs on the Jathral scheme, it had to be given up on account of the adverse conditions created by the war, and the arrangement for supplying water by means of bore-wells resorted to as an experimental measure. For this purpose, an estimate for Rs.10,000/- was also sanctioned. The latter scheme having proved more successful, the Director of Public Health got up an estimate, in January 1945, for Rs.1,34,000/- for supply of water to Chitaldrug Town by bore-wells and submitted him it for sanction. Later, this

was revised to Rs.1,80,000/- based on the quotations received for the work from the bore-wells, under this scheme, about 21,000 gallons of water per hour, are expected to be pumped and it was stated that this quantity would suffice for a population of about 16,000 in this town.

2. Further, it was subsequently found that the distribution system in Chitaldrug Town had considerably deteriorated and with a view to improving this, an estimate for Rs.1,14,000/- was prepared by the Chief Engineer for Irrigation and the same was submitted for sanction and in January 1946. The distribution work to the extent of about Rs.60,000/- available under the Natural Scheme was ordered to be made use of under the bore-wells scheme. In view of the great scarcity of water supply in Chitaldrug Town, the Chief Engineer for Irrigation issued instructions to the Sanitary Engineer to go ahead with the work.

3. The estimate for Rs.1,80,000/- was revised to Rs.2 lakhs by the Chief Engineer for Irrigation for reasons mentioned in his note dated 10th April 1947, in which it is reported that an additional expenditure of Rs.30,000/- had to be incurred, under compensation Rs.6,000/-, quarters to staff Rs.17,000/- and for purchase of new pumping sets Rs.26,000/-, as the Natural pumping sets are not useful for this installation. Thus the two estimates for improvement water supply to Chitaldrug Town by bore-wells and for improving the distribution System in the town aggregate Rs.3,14,000/- and the Chief Engineer for Irrigation solicits sanction of Government thereto.

4. The question of abandoning the Natural Source, either temporarily or permanently, has been examined by the Sanitary Engineer and the Chief Engineer. The Sanitary Engineer, in

his letter to the Chief Engineer, has reported that the present scheme of supplying water to Chitaldrug Town by bore-wells is satisfactory in as much as the bore-wells have a capacity of 11,000 gallons per hour, which would not only be adequate to meet the present requirements, but would also meet the prospective demands of an increasing population. Further, the Sanitary Engineer has brought to notice that, by actual experience, it was found that the Pathral Tank had not enough water for water supply purposes as well as for purpose of irrigation and that the tank had completely dried up in the year 1948. For these reasons, the Chief Engineer for Irrigation has recommended that the Pathral Scheme may be abandoned permanently in favour of the bore-wells which have been already sunk and are functioning.

5. As regards the loss that might accrue by abandoning the Pathral Scheme, the Sanitary Engineer has reported that some of the items of works executed under that scheme are being utilised for other works. The loss on this account is reported to have been brought down to Rs.27,237/-. As against this, the loss that would accrue by abandoning the bore-wells scheme is reported to come to Rs.16,26,710/-. Considering all these aspects and also having in view the success of the bore-well scheme, the Chief Engineer has expressed the opinion that the Pathral estimate may be closed once for all and the present estimate for Rs.3,14,000/- may be sanctioned.

6. The Financial Secretary, when consulted on the subject has observed that the estimate relating to Pathral Scheme may be closed with a net outlay of Rs.1.75 lakhs to be shared by Government and the Chitaldrug Municipality in the ratio of 3:1 (Government Rs.1.31 lakhs and Municipality 0.44 lakhs) and the present estimate for Rs.3.14 lakhs may be sanctioned. If the previous allocation of cost of 3:1 is adopted now also,

Government will have to contribute a sum of Rs.2.355 lakhs and Municipality a sum of Rs.75,500/-. The financial condition of this Municipality is not satisfactory. But still, action has to be taken for supply of drinking water to this town. It is a point for consideration whether a loan has to be sanctioned to the Municipality, as was done before, to meet its quota of cost under the bore-wells scheme. The Financial Secretary has observed in this connection as follows :-

> " The cost of these estimates may be borne in the same proportion 1:3, the Municipal share being Rs.75,000/-. But, as against the net outlay of Rs.1.75 lakhs on the Pathral Scheme, the Municipal share works out to 0.44 lakh, the excess of 0.15 lakh booked, in the loan account (which stands at Rs.30,000/-, may be taken into consideration and the Municipal share reduced to Rs.60,000/- which may be treated as a loan. The balance of Rs.2.81 lakhs may be met out of the provision under "30 Grants - 2 Improvements of Water Supply in Towns."

7. The points for orders are :-

(i) Sanctioning the two estimates aggregating Rs.3,14,000/- for (1) Improvement of Water Supply to Chitaldrug Town and (2) Improvement to the Distribution system in the Town.

(ii) Adoption of the same ratio of 3:1 in the matter of sharing the cost of the work by the Government and the Municipality as was done in the case of the Pathral Scheme. -

(iii) Granting a loan to the Chitaldrug Town Municipality to meet it's share of the cost as suggested by the Financial Secretary.

(iv) Closing the Pathral Scheme estimate with a net outlay of Rs.1.75 lakhs.

6.

5. The Government share of the expenditure will have to be met out of the grant for water supply in towns in the current year's State Budget or by applying for a special grant in view of the heaviness of the amount.

6. The Minister for Local Self-Government is in favour of the estimates being sanctioned. The Dewan having ordered that the matter may be circulated to the Ministers, this note is accordingly submitted.

DRAFT FINAL NOTE

Subject - Estimate amounting to Rs 6,09,700/- for underground drainage scheme for Chitaldrug Town

---

A) The existing surface drainage system in Chitaldrug Town was reported to be not working satisfactorily and the question of providing a suitable drainage system for this town, has been engaging the attention of Government from the year 1944 In November 1944, the Deputy Commissioner, Chitaldrug, submitted for sanction, an estimate

B) amounting to Rs 1,11,532 for the provision of Sylk Pattern Drains for carrying sullage and sewage, as prepared by the Sanitary Engineer, Bureau of Sanitary Engineering This estimate was forwarded to the Chief Engineer for Irrigation for scrutiny, and it was corrected by him after scrutiny, to Rs 1,06,775/-

2 When the papers were referred to the then Financial Secretary to Government (Mr B S Raghvendra Rao) he observed that the sylk pattern drains provided in the estimate are out of date and that the most modern drainage schemes are underground drainage schemes, and that as the necessary facilities for putting up the underground drainage existed in Mysore, Government may consider the desirability of sanctioning an underground drainage scheme to this town once for all The Deputy Commissioner,

C) Chitaldrug District and the Chief Engineer for Roads and Buildings were thereupon consulted on the above suggestion of the Financial Secretary

D) 3 In January 1947, the Deputy Commissioner, Chitaldrug District, submitted for sanction an estimate prepared by the Sanitary Engineer and approved by the

E) Director of Public Health for Rs 5,86,550/- for providing an underground drainage system for Chitaldrug Town together with the resolution of the Chitaldrug Municipal

Municipal Council dated 31st August 1945 stating that the underground drainage scheme be adopted and Government be requested to meet half the cost, the remaining half being granted by the Government as a loan to the Municipality repayable in 25 annual instalments It was also stated in the above resolution that the revenue from ~~the~~ tolls will be earmarked to meet the loan liabilities due to the Government towards instalments and interest The estimate for Rs 5,86,550/- was scrutinised by the Chief Engineer for Roads and Buildings and the Auditor, Public Works Department and it has been corrected to Rs 6,09,700/- It has also been ~~duly~~ countersigned by the President, Chitaldrug Town Municipal Council

4 In the report accompanying the above estimate, ~~water~~ supply of water at 15 gallons per head per day has been assumed for a successful working of the underground drainage system In this connection, it may be stated that an estimate for Rs 3,14,000/- for improving the Water Supply ~~scheme~~ arrangement at Chitaldrug and ~~for improving~~ the distribution system ~~therein~~, has been recently sanctioned by the Government

5 When the papers were submitted to me, I minuted as follows -

"I had a personal discussion with the President, Chitaldrug Town Municipality, a week back He assured me that he is confident of the estimated income (and which is also) sufficient to repay the Government loans They have set apart the toll-gate income amounting to nearly Rs 16,000/- towards repayment of the Government loans Besides, they are expecting a good lot of income by disposing of the new sites I have personally inspected this town which is very badly in need of underground drainage. The loan to be repaid as recommended.

recommended by the Deputy Commissioner may be recovered out of the toll gate realisation and necessary arrangement may be made accordingly to earmark the above income towards the above loan Hence I am in favour of sanctioning this scheme This may be placed before the Council"

When the papers were forwarded to Financial Secretary, he made the following enquiries -

"What is the rate of interest proposed to be charged for this loan? What other loans are outstanding against this Municipality and is the normal income exclusive of the toll revenue sufficient to repay the same? If the toll revenue is not enough to repay the annual instalments of this particular loan (both principal and interest) is the normal income enough to make up the deficiency? If there is an all round deficiency, is there any scope for additional taxation and is any such proposed and accepted?"

7 The Deputy Commissioner, Chitaldrug, has reported that the Municipal Council is agreeable to pay interest at 2% or a little more and that no loan is outstanding against this Municipality He has also stated that if the scheme is sanctioned, the Municipality has to pay per year an annuity of Rs 18,291 (Principal Rs 12,194 and interest at 2% 6,097) and that the toll revenue which is at present Rs 14,603 and which may go up to Rs 20,000 is sufficient to repay the loan An additional revenue of Rs 50,000 is also expected from the levy of octroi on certain articles, which has since been sanctioned by Government It is also proposed to levy additional taxes such as taxes on immoveable properties, general water rate etc , and the Deputy Commissioner has assured that there would not be deficiency all round

The matter was considered at a meeting of the ~~in~~ Council on the 20th May 1948, and the following resolution was recorded -

i) The estimate amounting to R 6,09,700 for Underground Drainage Scheme for Chitaldrug Town ~~be~~ is sanctioned

ii) Half the amount may be given by way of grant

iii) Half the amount may be given as loan

iv) The interest may be charged at 4% per annum

I solicit the gracious sanction of His Highness to the above resolution of the Council

The work will be spread over a period of three years and the Govt Grant also will be given at the rate of Rupees one lakh each year, the balance being adjusted in the last year

To C Narayanaswami Naidu, Esquire, B A, B L,
Legal Remembrancer and Secretary to Government,
Law Department, Bangalore

Subject, Comprehensive drainage scheme of Chitaldrug town

Sir,

In forwarding herewith the entire file of records ending with letter No A P R 20/44-45 dated 10-11-1944 received from the President, Town Municipal Council, Chitaldrug, on the above subject, I have the honour to state that an estimate amounting to Rs 1,11,530/ prepared by the Sanitary Department for providing drainage to the town, was sent to the President of Chitaldrug Municipality, with a request to place the same before the Municipal Council to suggest ways and means of financing the project. The Municipal Council, at its meeting held on the 30th September 1944, resolved, after discussion, that the scheme may be taken up immediately and that Government be requested to sanction a grant of half the estimated cost and that the other half may be granted as a loan repayable in easy annual instalments. As source of Income from which the loan would be repaid in annual instalments was not pointed out by the President, his attention was drawn to Rule 384 of the Municipal Account Manual. The -- letter received from him explaining that the loan could be -- discharged from the savings to be effected annually is herein enclosed for favour of kind perusal. It is no doubt true that the financial condition of the Municipality is gradually -- improving and that the loan can be discharged out of the closing balance at the end of each year. A comprehensive drainage

contd

for the town is a great necessity and it would help the improvement of the sanitation of the town and as a result, the health of the Public in general

Under these circumstances, I request that Govt. may be pleased to accord sanction to the estimate amounting to Rs 1,11,532/ half the cost being given as a grant from Government, as promised by the Minister for L S G and Public Health in his tour notes, and the other half being given as a loan repayable in 25 annual instalments

The estimate and plans are herewith sent

I have the honour to be,
Sir,
Your most obedient Servant,

To,

The D C Chittaldroog Ele,

With reference to your letter No H6 673/44 & 30-4-44 recommending, among others, sanction to the grant of a loan to the Chittaldroog Town Municipal to enable it to meet its portion of the cost of the drainage scheme at the place, I am directed to state that it is not clear why the Municipal has considered it necessary to take a loan from the provincial when it can meet its share of the cost of the drainage scheme from out of its normal sources every year if it can however make out a case as forecasted from the functional budget estimates for 1944-45

Subject - Drainage scheme of Chitaldrug Town

Sir,

Adverting to your letter No L 7967/M L 117-442 dated the 10th February 1945 requesting me to ascertain and intimate as to why it is necessary for the Chitaldrug Municipality to take a loan from the Government when it can meet its share of the cost of the above scheme from out of its normal sources every year and if it can make out a case for the loan asked for, a definite source of revenue should be ear-marked for the repayment of the loan, I have the honour to state that the estimated cost of the scheme is Rs 1,11,532/- and the municipality in its present financial condition cannot meet half the cost in one lump some The Municipal council has to meet the heavy charges of the water supply scheme and its maintenance and hence the need for a loan As regards the repayment of the loan asked for, the Municipal council, at its meeting convened on the 31st March 1945, has resolved that the instalment of loan payable annually may be met out of the realisations of ~~fuel~~ toll revenue which comes to about 14 to 16 thousa repees per annum

In enclosing herein a copy of the resolution of the Municipal Council, I request that Government may be pleased to accord sancti to the estimate amounting to Rs 1,11,532/- half the cost being giv a grant from Government, as promised by the Minister for Local Se Government and Public Health in his tour notes and the other hal being given as a loan repayable in 25 annual instalments, as already ommended in my letter of even number dated the 30th November 1944

P/0

The entire records containing plans and estimates are herewith returned

I have the honour to be,
Sir,
Your most obedient servant,

The D.C Chittagong

Sir,

With reference to your letter no A6 673/44 dt 15/4/45 re the Chittagong drainage scheme, I am directed to observe as follows:—

The Sylk pattern drains were proposed to be constructed at an estimated cost of Rs 1,11,523/- for carrying sewage and village of the Town are out of date and the most of modern drainage is undesigned. Moreover, it has been brought to the notice of Govt that the Sylk pattern drains already constructed in several Town are minor

WD 03697—GPB—30 000—2 2 46

of numerous municipalities in the
old are so badly constructed neglected
and in disrepair that the sewage
and tillage stagnate badly
and this type of drainage becomes a fruitful
source for accumulating filth which
results in the spread of numerous diseases in the
and the causes - In these circumstances, local areas
feel under that it would be
to take up once for all the underground
drainage scheme at the tail end instead
of carrying out work of the ad hoc pattern type,
having regard to the fact that the town
will, in the near future, be provided with a
definite water supply scheme
In the event of any to add that
of the question may think be examined in consultation
with the Board of Sanitary Engineering and a
report submitted to you very early.
The local Council may also be consulted in
the matter informed of the above facts of their views
obtained ascertained
Records are enclosed,

I have etc

L-1018 14/6/45 John Bodkin Secy

Copy of the above is forwarded with the compliments of Rd B so that he may be in a position to furnish a report upon at an early date

Secretary to Government, Revenue Department, Bangalore

Subject, Under-ground drainage scheme for Chitaldrug town

Sir,

With reference to your letter No L 1017 Ml 117-44-3 dated 14-8-1945 intimating that the sylk Pattern drains, proposed to be constructed at an estimated cost of Rs 111523/ for carrying sewage and sullage of the town are out of date and the most modern kind of drainage is the underground one, I have the honour to state that the Sanitary Engineer who was requested by this office, has furnished a scheme estimated to cost Rs 586550/ to the President of the Municipality The President of Chitaldrug Municipality reported in his lett No H C 194/46-47 dated 3-1-1947 that he has countersigned thi estimate and returned it to the Sanitary Engineer for submission to Government

The President further reports that the surface drains in the town are in a very bad condition and the Sanitation has become very bad on this account that the town has expanded on all sides and a number of localities have not yet been provided with any drains He requests that the scheme may kindly be taken up immediately

The Municipal Council at its meeting held on 31-8-45 has resolved that Govt may be requested to meet half the cost of the scheme the other half being met by the Municipality, and ~~the Government might be requested~~ to sanction a loan to the Municipality repayable in 25 yearly instalments to meet its share of the cost The council has further resolved that the toll Revenue which at present stands at Rs 14603/ might be earmarked towards the repayment of this loan and that there is every prospect of this Revenue increasing to Rs 20000/- on account of the favourable seasonal conditions prevailing.

As regards the water supply facilities required for the drainage, the President reports that bore well scheme has been a great success and there is copious water supply

I have also inspected the town several times and I feel that the underground drainage is a great desideratum for this growing town whose population has been on the increase from year to year There is no satisfactory arrangement for scavenging in the town at all for want of scavengers Efforts made to get scavengers from outside have all been in vain There is a loud clamour by the public that the sanitation of the town has been going from bad to worse as little or no attention is being paid by the Municipality in regard to scavenging for the reasons above stated

I request that immediate orders of Government may be obtained for sanctioning the scheme, and if possible to start the work in anticipation of sanction in view of its great urgency

Copy of letter-No H C 194/46-47 dated 3-1-1947 received from the President, Chitaldrug Municipality and a copy of the Resolution of the council passed at its meeting held on 31-8-1945 are enclosed herewith for favour of reference

I have the honour to be,
Sir,
Your most obedient Servant,

Deputy Commissioner,
Chitaldrug District

Letter No H C 104/46-47 dated 2-1-1947 from the President, Town Municipal Council,Chitaldrug to the Deputy Commissioner, Chitaldrug District,Chitaldrug

===

Re Under ground drainage scheme for Chitaldrug Town

======

I have the honour to enclose herewith a copy of my letter written to the Sanitary Engineer, in response to his reference No 615/16 dated 28-12-1946 As stated in my letter, the estimates have been countersigned and returned ~~xxxx~~ to him for submission to Government A copy of the resolution of the Municipal Council is also enclosed for ready reference

The existing surface drains in the town are very bad and are emanating stinking smell on account of stagnation The town has grown in extent and population and a number of localities have not been provided with any drains On account of the extreme urgency due to bad sanitary condition, comprehensive scheme for surface drainage was submitted to Govt for sanction and the Govt in their letter No 1017/M1 117-44-3 dated 14th August 1945 have ordered that the Under Ground Drainage scheme may be taken up once for all

The Municipal Council has requested the Govt to meet half the cost of the scheme by out right grant and to advance the other half amount as loan which shall be returned to Govt by easy instalments in a period of about 25 years and that the toll revenue shall be earmarked for the return of the said instalment The toll revenue of this Municipality had gone up to Rs 17,000/ previous to the war and is now yielding a revenue of Rs 14,603/ during the year 1946-47 This shortage in revenue is due to the food control and the transport being done by Govt Lorries Further, there was absolute failure of rains during the last 2-3 years and the commercial crops had completely failed We have good rains this year and with the expectation of the gradual relaxation of control orders, I can confidently say that the Toll Revenue will again gradually increase considerably In the future years to come, it can safely be expected to come up to about Rs 20,000/ The Municipality is therefore in sound position to pay the instalments that the Government may fix from out

out of the Toll Revenue every year The annual income of the Municipality has increased from Rs,51,796/ to Rs 1,10,000/ and odd The normal income itself has risen up to Rs 78,233/ which proves the sound financial position of the Municipality

As you are aware, the new Bore-well scheme has satisfactorily solved the water supply for this town and there will be no difficulty for supply of water if the work of laying the distribution lines is completed The improvement of the source of water supply is expected to suffice even a population of about 50,000/ and sufficient provision has been made for the growth of the town in future years

Under these circumstances, I request you kindly to recommend to the Government for early sanction of the under Ground drainage scheme for Chitaldrug town

Ramaprasad Aiyangar 20/1/47

For Chief Engineer for R & B

R E P O R T.

Report to accompany the estimate for the underground drainage scheme for Chitaldrug Town.

The Chitaldrug Town is the District Head Quarters of Chitaldrug District and it is situated one mile from the Chitaldrug railway station. The population of the town at present is about 18,000. The present supply of water to the town is 10 gallons per head per day, from Borewells and it is could be raised to 15 gallons per had per day, when the underground Drainge scheme is put into service.

For purposes of designing the sections of sewers, the water supply is assumed as 15 gallons per head per day and the flow in wet whether to 3 times the flow in dry weather. The average rainfall in the locality is 20" per annum.

The main ridge is running from North to South, dividing the Town into two parts. Only one outfall is proposed, although the ridge line runs in middle as it does not involve ~~xxxxxxx~~ very deep cutting. A septic tankfor a prospective population of 21,000 is proposed to be constructed and the sewage after suitable treatment is proposed to be used for irrigating lands. The required area of land is available and a provision of Rs. 10,000/- is made in the estimate for the acquisition of land.

In this scheme all the street underground sewers are provided with 7" diameter pipes. The main pipe sewer runs from West to East and the total length of the main is 7907 feet, ranging in diameters from 9" to 18". The size of pipes provided for well be sufficient to carry the sewage of a population 20% more than the calculated one.

As regards the Sub-main, it runs from South to North and starts from the Engineering Office corner and joins the main line at the point I and the total length of the sub-mains is 5853. Glazed stone ware pipe of 9" and 12" are proposed for the submain. All the pipe sections are designed taking the supply of water as 15 gallons per had per day. (24 hours) in dry weather, and three times the above discharge is taken for wet weather flow.

The sewers are capable of discharging about 20% more than the above weather flow, so that the project is suited to meet the requirements of the town for many years to come.

The Scheme is to irrigate @ 5000 gallons per acre, 50 acres of land to be irrigated for which an acquisition charge @ 200/- per acre is provided. The area of land is available as per revenue sewage extracts. This portion of land is quite suitable for agricultural purposes.

The total cost of the scheme is Rs. 7,01,319/- including house connections. The cost of the giving house connections will be Rs. 1,80,000/- which has to be borne by the respective owners of houses taking the house connections. The actual cost of the scheme will therefore be 5,50,500/- which includes the provision of Establishment, Tools and Plant charges 12 %. The rates provided in the estimate for different items of work are as per current schedule.

Sanitary Engineer.

Subject Underground drainage Scheme for Chitaldrug Town

Dear Sir,

Refering to the correspondence ending with your letter No A6-673/44-45 dated the 11th January 1947 on the above subject, I am desired to state that the estimate for the underground Drinage Scheme for Chitaldrug Town has come up to Rs 6,09,700/- as scrutinised and corrected by the Chief Engineer for Roads and Buildings, as against Rs 5,86,550/- mentioned in your letter under reply It is seen from the proposal that the expenditure is proposed to be met in equal proportions by the Government and the Municipality, a loan being also sanctioned to the Municipality to bear its own share of half the cost, repayable in 25 yearly instalments In this connection, the following particulars which are required for the disposal of this question may kindly be furnished immediately:-

1) What is the rate of interest proposed to be charged in respect of the loan to be granted to the Municipality?

2) What other loans are outstanding against this Municipality? Or have loans been recommended to be granted to this Municipality on pending schemes e g , Water Supply Scheme etc

3) Is the normal income, exclusive of Toll Revenue, sufficient to repay these loans?

4) As the Toll Revenue does not appear to be sufficient to repay the annual instalments of this particular loan if sanctioned in connection with the Undsrground Drainage Scheme (both principal and interest), is the normal income enough to make up the deficiency?

5) If there is an all round deficiency, is there any scope for additional taxation?

The proposal for the levy of Octroi on certain articles imported into the Chitaldrug Municipal limits such as Cocoanu

etc

etc. sent up with your letter No. A6 P R 33/47-48 dated the 26th January 1948 has been sanctioned separately What will be the total approximate revenue from this source and can this revenue or ax part of this revenue be earmarked towards the repayment of the loan to be granted by the Government?

The favour of an immediate reply is requested

Yours sincerely,

o/c

Subject, Underground drainage scheme for Chitaldrug town

Sir,

With reference to your D O No L 13745 dated 20-2-48, on the above subject, I have the honour to state that the Municipal Council at its meeting held on 28-2-1948 has resolved that,

1) The Municipal Council is agreeable to pay interest at 2% or a little more that may be levied by the Govt

2) that the toll revenue would be earmarked for payment of the loan and the interest

3) that the council has already proposed the levy of Octroi on 22 items of articles the realisation of which may come up to Rs 50,000/ The council requests the Govt to sanction the scheme

I note below the replies to the 5 points raised in your D O under reply

Points raised in the D O	Replies to the several points raised
1) What is the rate of interest proposed to be charged in respect of the loan to be granted to the Municipality?	The Municipal council is agreeable to pay interest at 2% or a little more As the council is agreeable to meet a moiety of the cost, interest on the loan to be sanctioned may kindly be charged at 2% as a special case The annual instalment (loan of Rs 304850/ repayable in 25 yearly instalments at 2% interest) will be Rs. 12194/ and interest will be Rs 6097/
2) What other loans are outstanding against this Municipality? or have loans been recommended to be granted to this Municipality on pending schemes ie, water supply scheme etc?	No loan is outstanding against this Municipality No recommendation has been made for the grant of loan on pending schemes in this Municipality
3) Is the normal income exclusive of toll Revenue sufficient to repay these loans?	This question will not arise in view of the replies to question No 2 The Municipality has not raised loans so far
4) As the toll Revenue does not appear to be sufficient to repay the annual instalments of this particular loan if sanctined in connection with the underground drainage scheme (both principal and interest) is the normal income enough to make up the deficiency?	If the scheme is sanctioned, the Municipality has to pay per year an annuity of Rs 18291/ (principal 12194/ interest at 2% ie, 6097/) The toll revenue at present is Rs 14603/ It is expected to raise up to Rs 20000/ during 1948-49) on account of the decontro of food stuffs etc and restoration of trade The toll revenue itself is

Correspondence ending with letter No M6 C 673/44-5 dated 27th March 1948 from the Deputy Commissioner, Chitaldrug District, requesting sanction to ~~an~~ the estimate amounting to Rs 6,09,700/- for the underground drainage scheme for Chitaldrug Town

---

ORDER NO L 925-31 Rs 29 7 48

Dated, Bangalore, the 3/8/1948

The existing surface drainage system in Chitaldrug Town, was reported to be not working satisfactorily and the question of providing a suitable drainage system for this town, has been engaging the attention of Government from the year 1944 In November 1944, the Deputy Commissioner, Chitaldrug District, submitted for sanction an estimate amounting to Rs 1,11,532/- for the provision of Sylk pattern drains, for carrying sullage and sewage, as prepared by the Sanitary Engineer, Bureau of Sanitary Engineering The estimate was forwarded to the Chief Engineer for Irrigation for scrutiny and it was corrected by him after scrutiny to Rs 1,06,775/-

When the papers were received for sanction of Government, it was suggested that as Sylk pattern drains were out of date and as the necessary facilities existed in the State Laying Mysore, for the underground drainage system, which was the modern system and for which a growing and important town like Chitaldrug would have to go in eventually, the Municipality may consider once for all the desirability of having an underground drainage system for the town

In January 1947, the Deputy Commissioner

Chitaldrug District, submitted for sanction an estimate prepared by the Sanitary Engineer, and approved by the Director of Public Health, for Rs 5,86,550/- for providing an underground drainage system for Chitaldrug Town, together with the resolution of the Chitaldrug Municipal Council, dated 31st August 1945 stating that the underground drainage system be adopted and Government be requested to meet ~~the~~ half the cost, the remaining half being granted by the Government as a loan, to the Municipality repayable in 25 annual instalments The estimate for Rs 5,86,550/- was scrutinised by the Chief Engineer for Roads and Buildings and the Auditor, Public Works Department, and corrected to Rs 6,09,700/-

In the report accompanying the above estimate supply of water at 15 gallons per head per day has been assumed for a successful working of the underground drainage system To ensure an adequate supply of water for this purpose for the town, Government have recently sanctioned an estimate for Rs 3,14,000/- for improving the water supply arrangement and the distribution system at Chitaldrug

The ~~ability of the Chitaldrug Municipality to satisfactorily discharge their obligations if~~ terms and conditions of repayment of the loan to be sanctioned to meet the Municipal share of the expenditure ~~was~~ were next examined. The Municipal Council, in their resolution dated 28th February 1948, ~~have~~ decided to ear-mark their town revenue towards meeting the loan instalments and the interest payments due, and have also proposed to levy octroi on some additional articles coming into the Municipality to improve their resources Together with

After a consideration of all the aspects of the case, Government are pleased to sanction the

estimate for Rs 6,09,700 (Rupees six lakhs nine thousand and seven hundred) for the construction of an underground drainage ~~scheme~~ System in Chitaldrug Town and to sanction half the amount viz , Rs 3,04,850 (Rupees three lakhs four thousand and eight hundred and fifty) as an outright grant to the Municipality towards this ~~scheme~~ work

(2) Government are also pleased to sanction a loan of Rs 3,04,850/- (Rupees ~~3~~ three lakhs, four thousa eight hundred and fifty) bearing interest at the rate of 4% per annum and repayable in 25 yearly instalments, to the Chitaldrug Town Municipal Council to meet their share of the expenditure

The DC Chitaldrug DyH is requested to see that the required provision is made in the annual budgets for the duly first repayment of the loan

(3) The work will be spread over a period of three years

(4) The Government grant also will be given at the rate of Rupees one lakh each year, the balance being adjusted in the last year The grant will be debited each year to the provision made in the State Budget under Town Improvement Grants

(5) The Chief Engineer for Roads and Buildings and the Deputy Commissioner, Chitaldrug District are requested to take all necessary further actio in the matter and see that the work is taken up and completed within the stipulated period

Dear Sir,

Subject, Underground drainage scheme in Chitaldrug town
====

Adverting to Government order No L 925-31 MI 117-44-5 dated 29-7-1948 sanctioning an estimate amounting to Rs. 6,09,700/ for the construction of an underground drainage system in Chitaldrug town etc, I write to state that only the estimate in respect of the work has been received in this office along with the above copy of Government order Action has been taken to draw the loan amount and the Govt. grant and to place it at the disposal of the Sanitary Department The President of the Chitaldrug Municipality has intimated that the plan of the above work is not available in his office The Sanitary Engineer in his letter No 410 dated 4-10-1948(copy enclosed herewith) states that the plans have not been received in his office and it is likely that the same might have been left behind in your office

The work has to be taken up early It is arranged to have the inaugural stone of the scheme laid by His Highness the Maharaja during his ensuing visit to Chitaldrug next month The plans are not received in this office nor they are available with the President of the Chitaldrug Municipality I, therefore request you to kindly arrange to send the plans if available in your office to the Sanitary Engineer, so that the work may be taken on hand early

Yours Sincerely,
H N Pallegar
